INDEX

Volume, 35, 1956

ACID: amino; 255, 260, 263
——: salivary sediment, fluoride, 197
Acid formation: dental plaques, 778, 786, 792
——: ——; salivary sediment; sugar, 220
Aciduric bacteria: 404
——: environment; establishment, 596
Adamantinoma: mucoepidermoid variation, 955*
Adenitis: obstructive; experimental, 852
ADLER, P.: caries incidence; adolescents; occlusion, 344
Adrenal cortex: histochemistry, 547
ALLEN, T. J.: dental restorative materials; antibacterial effects, 25
ALTINSEL, H. H.: antibiotics; endodontics and operative procedures, 914
Aluminum oxide: effect on lungs, 693
Amalgam restorations: residual mercury; strength, 458
Ameloblastoma: (see adamantinoma)
Amino acid composition: dentin, 255
——: ——; variations, 263
——: enamel, 260
——: ——; variations, 263
Ammonia: saliva, 438
Amylase: saliva; determination, 391
ANDERS, J. T.: chloride level; saliva, 753
——: dimethylaminobenzaldehyde; salivary tryptophane measure, 241
——: salivary acidity; alkalinity; caries, 385
ANDERSON, D. J.: mastication stress, 671
——: stress measurement; mastication, 664
Anesthesia: inferior alveolar nerve block; epinephrine effects, 696
——: procaine, 696
——: Xylocaine, 824
Anomalies: anthropologic study, 968*
Antibiotics: endodontics, 656
Anti-enzyme action: fluoride, 189
Antiseptics: endodontics, 656
Aorta: calcification, 970*
Arch width: 4 to 8 years, 879
ARNIM, S. S.: pH; dental plaque; saliva, 83
ASGAR, K.: chemical analysis; teeth, 742

BACTERIA: aciduric, 404, 596
——: antibacterial effects; restorative materials, 25
——: antibiotic effect, 399
——: biochemical studies, 603
——: chondrosulfatase production, 299
——: "fusospirochetal" exudate; experimental injection, 4
——: pH levels; glucose solutions, 226
——: saliva; caries-susceptible; caries-immune, 572
——: sorbitol fermentation, 233
——: (see also specific names)
Bacterial flora: changes; extracted teeth, 965*
BAINS, M. E. D.: residual monomer, polyethyl methacrylate, 16
BARETTO, M. A.: Oral hygiene habits; periodontal disease, 645
BARTHA, E.: rat incisor; eruption; prolonged sleep effect, 562
BATTISTONE, G. C.: amino acid composition; dentin; enamel; variations, 263
——: ——; dentinal protein, 255
——: ——; enamel protein, 260
BENARDE, M. A.: rat saliva collection, 326
BEN SHUSHAN, D.: caries prevalence; Israel, 630
BEVELANDER, G.: pulpal calcification; histogenesis and histochemistry, 714
——: stratum intermedium; tooth development, 969*
BHASKAR, S. N.: experimental obstructive adenitis, 852
——: mucoceles; pathogenesis, 863
——: squamoso-mandibular articulation; development; rat, 533
Birth season: primary dentition, 909
BISSET, K. A.: salivary lactobacilli; classification, 964*
BIXLER, D.: adrenal cortex; histochemistry; salivary gland removal, 547
——: caries activity; desalivated rats, 615
BLACKWELL, R. Q.: sucrose effects; enamel solubility, 210
BLAKE, G. C.: diffusion pathways; cementum; dentin; enamel, 961*
Blood loss: oral surgery, 175
Blood vessels: pulp, 957*
BOLDEN, T. E.: experimental obstructive adenitis, 852
——: mucoceles; pathogenesis, 863
Bone: oxidase, 276
——: peroxidase, 276
——: phosphatase, 276
——: starch sponge; implant, 446
Bone bank: calcifying mechanism, 970*
Boric acid: histochemical blocking; reagent, 965*
BOWEN, R. L.: epoxy resins; restorative material, 360
BRAIN, E. B.: nerves; silver staining; urea solutions, 958*
BREWER, H. E.: enamel permeability; fluorides, 59
BRUDEVOLD, F.: fluoride distribution; enamel, 420
——: lead distribution; enamel, 430
——: resin composition; bonding to dentin, 846
——: tin distribution; enamel, 749
BUONOCORE, M.: resin composition; bonding to dentin, 846
Bur: inverted cone design factor effects, 704

*Abstract.

BURNETT, G. W.: amino acid composition; dentinal protein, 255
——: ——; dentin; enamel; variations, 263
——: ——; enamel protein, 260
——: dissolution rate; inorganic dentin; fluorides, 413
——: errata, 165
——: reducing activity; lactobacilli, 370
BURGER, M.: bone bank preservation; calcifying mechanism, 970*
——: in vitro calcification; aorta; soft tissues, 970*
Bushmen: primitive; acid formation; plaque, 786

CALCIFICATION: aorta, 970*
——: pulp; histogenesis and histochemistry, 714
——: sequence; mandibular molars and premolars, 555
——: soft tissues, 970*
Calcifying mechanism: bone bank preservation, 970*
Calcium: radioactive; tooth mineralization, 147
Carbohydrate: enamel, 966*
——: food; oral rinsing; anthrone method, 90
Caries: acid formation; immune individuals, 792
——: activity tests; evaluation, 332
——: arrested, 956*
——: desalivated rats, 615
——: diagnosis; radiographs, 33
——: diet, 39, 95, 638
——: distribution; rats; sexual similarity, 286
——: factors; proportionate relevance, 969*
——: fissure widths, 620
——: fluorides, 49, 54
——: food habits, 638
——: gingival plaque; hamster, 651
——: hamster, 95, 651
——: Israel, 630
——: lactic acid formation; plaques, 778
——: lactobacilli; Hunt-Hoppert rats, 586
——: nutrition, 39, 95, 638
——: occlusion; incidence, 334
——: punched-card records, 950
——: rat, 39, 286, 615, 586
——: saliva; acidity and alkalinity, 385
——: ——; immune and susceptible, 572
——: sodium fluoride, 54
——: sodium silico-fluoride, 54
——: stannous-fluoride dentifrice, 49
CARTER, W. J.: dental plaque; acid formation; caries-active individuals, 778
——: ——; ——; caries-immune individuals, 792
Cavity liners: plastic emulsions, 956*
Cavity walls: surface appearance; instruments, 509
Cementum: differential stain, 491
——: diffusion pathways, 961*
CHARLTON, J.: lactobacillus isolation; efficiency; two media, 800
Chewing: salivary secretory activity, 963*
Chloride level: saliva, 753
Chondrosulfatase production: oral bacteria, 299
CLARK, C. A.: aluminum oxide; effect on lungs, 693
Classification: teeth, 961*
CLAYCOMB, C. K.: laboratory tests for caries activity; evaluation, 332
——: salivary amylase; determination, 391
CLEGG, C. T.: ammonia production; saliva, 438
——: lactic acid production; saliva, 612
CLEMENTS, A. J.: dental plaque; acid formation; primitive Bushmen, 786
Composition: teeth, 742
——: ——; ammonia acid, 255, 260, 263
Condyle: mandibular; remolding, 137
Connecticut: caries; food habits, 638
COOKE, B. E. D.: oral epithelium; nevi, 954*
COSTICH, E. R.: inferior alveolar nerve block anesthesia, 696
Cotton fibers: operative wounds, 956*
COWAN, A.: anesthesia; Xylocaine evaluation, 824
COX, G. J.: punched-card records; carious lesions, 950
CRABB, H. S. M.: x-ray investigations; developing enamel, 960*
CRAWFORD, W. H.: fluid penetration; fillings and teeth, 518
CROWLEY, R. E.: personality factors; cooperation in dental treatment, 157
Cultivation: in vitro; tooth germs, 440, 523, 960*
CUNAT, J. J.: squamoso-mandibular articulation; development; rat, 533
Cuspal and palatal slopes of teeth: inclined planes of glenoid fossa, 890
Cynatosis: periodontal findings, 840

DALDERUP, L. M.: caries; nutrition; histologic investigations, 39
DALL, R.: caries; food habits; Connecticut, 638
DAVIES, G. M.: dental conditions; Polynesians; malocclusion, 115
——: periodontal disease; Polynesians, 734
DAVIS, G. H. G.: salivary lactobacilli; classification, 964*
DAY, H. G.: stannous-fluoride dentifrice; caries; adults, 49
DE MARCO, C.: fluoridation; enamel solubility, 185
Dental lamina: 959*
Dental plaque: acid formation, 786, 792
Dentin: amino acid composition, 255, 263
——: bonding of resins, 846
——: chemical analysis, 742
——: diffusion pathways, 961*
——: fluoride, 205, 413, 962*
——: lipid, 273
——: microradiographic studies, 963*
——: organic matters; ethylenediamine vs. KOH-glycol, 947
——: oxidase, 276
——: peroxidase, 276
——: phosphatase, 276
——: protein; amino acid composition, 255

Design factor: inverted cone bur, 704
DEUSCHLE, F. M.: congenital dentofacial malformations; maternal dietary deficiency, 674
Diagnosis: caries; radiographs, 33
Diamond knife: ultrathin sections, 962*
DIENSTEIN, B.: biometric analysis; root development and eruption, 479
Diet: caries, 39, 95, 638
——: fats; odontogenesis, 930
——: maternal deficiency; dentofacial malformations, 674
Diffusion pathways: enamel; dentin; cementum, 961*
Dimethylaminoaldehyde: salivary tryptophane; measure, 241
DI SALVO, N. A.: proportionate relevance; human caries factors, 969*
DIXON, A. D.: maxilla; early developments; enamel, 959*
DOCTOR, R. H.: oral hygiene habits; periodontal disease, 645
DODD, M. C.: bacterial flora; caries-susceptible and caries-immune saliva, 572
——: sorbitol fermentation; oral bacteria, 233
DREIZEN, S.: penicillin-sensitive oral bacteria; protection; yeasts, 249
DUNN, J. K.: dental plaque; acid formation; caries-active individuals, 778

EDITOR'S Viewpoint: 1, 167, 329, 495, 661, 821
EICHEL, B.: in vitro calcification; aorta; soft tissues, 970*
Electrometric studies: gingiva; pregnancy, 566
Enamel: abnormal; formation; vaccinia, 685
——: amino acid composition, 260, 263
——: carbohydrate content, 966*
——: defects; birth season, 909
——: diffusion pathways, 961*
——: fluoride; anti-enzyme action, 189
——: ——; distribution, 420
——: ——; organic and inorganic fractions, 205
——: ——; uptake, 962*
——: Hunger-Schreger bands, 804
——: lead distribution, 430
——: lipid, 273
——: microradiographic studies, 963*
——: permeability; fluorides, 59
——: protein; amino acid, 260
——: solubility; fluoridation, 185
——: ——; sucrose effect, 210
——: tin, 749
——: x-ray investigations, 960*
Enamel cuticle: 313
Enamel organs: cells, 960*
Endodontics: antibiotics, 659, 914
——: antiseptics, 656
ENGEL, M. B.: gingiva; pregnancy; electrometric studies, 566
ENGLANDER, H. R.: dental plaque; acid formation; caries-immune individuals, 792
ENGLISH, J. A.: enzymatic activity; radiated salivary glands, 967*
Enzymatic activity: salivary glands, 967*
Epinephrine: effect in inferior alveolar nerve block anesthesia, 696
Epithelial attachment: study method, 308
Epoxy resins: 360
ERLENBACH, F. M.: caries; food habits; Connecticut, 638
Eruption: biometric analysis; rat molar, 479
——: rat incisor; prolonged sleep effect, 562
ESSELBAUGH, N. C.: caries experience; Washington State College; students, 132
Estrogen: urinary; periodontosis, 648
Ethylenediamine: organic dentin, 947
ETTLEMAN, L.: ethylenediamine vs. KOH-glycol; organic dentin, 947

FABER, J. E., JR.: aciduric oral micrococci, 404
FABIAN, F. W.: rat saliva collection, 326
FAIRHURST, C. W.: hygroscopic expansion, 499
FAJARDA, O. P.: endodontics; antiseptics; antibiotics, 656
FARMER, E. D.: recurrent ulcerations of oral mucosa, 954*
Fats: odontogenesis, 930
FEARNHEAD, R. W.: ultrathin sections; diamond knife, 962*
FINN, S. B.: fluoridation; enamel solubility, 185
FISCHER, R. B.: enamel permeability; fluorides, 59
——: x-ray fluorapatite pattern; fluoride treatment, 773
Fissure widths: caries, 620
FITZGERALD, R. J.: aciduric oral micrococci, 404
FLANAGAN, F.: mandibular condyle remolding; osteoclasts, 137
Fluorapatite: pattern; x-ray, 773
Fluoride: acid formation; salivary sediment, 197
——: anti-enzyme action, 189
——: dentin uptake, 962*
——: enamel distribution, 420
——: enamel permeability, 59
——: enamel solubility, 185
——: enamel uptake, 962*
——: fluorapatite pattern, 773
——: inorganic dentin dissolution, 413
——: lactobacilli, 939
——: organic and inorganic fractions; dentin and enamel, 205
——: pulp effects, 69
——: salivary gland effects, 922
——: skeletal storage, 65
——: sodium; caries, 54
——: ——; protozoa rotifera, 763
——: sodium silico; caries, 54
——: stannous; dentifrice; caries, 49
——: ——; urinary fluoride levels, 760
FOSDICK, L. S.: dental plaque; acid formation; caries-active individuals, 778
——: ——; ——; caries-immune individuals, 792
——: ——; ——; primitive Bushmen, 786
——: sucrose effects; enamel solubility, 210
FRIEDLAND, R.: periodontosis; urinary estrogen, 648

"Fusospirochetal" material: experimental injection, 4

GAIRNS, F. W.: sensory nerve endings; gingiva; palate; tongue, 958*
GALAGAN, D. J.: caries diagnosis; radiographs, 33
GANS, B. J.: gingiva; pregnancy; electrometric studies, 566
GARDNER, D. E.: fluoride distribution; enamel, 420
GARDNER, M. K.: laboratory tests for caries activity; evaluation, 332
GARN, S. M.: calcification sequence; mandibular molars and premolars, 555
GILMORE, R. W.: saliva; flow rate during sleep, 190
Gingiva: nerve endings, 958*
——: pregnancy, 566
Gingival crevices: bacteria; chondrosulfatase, 299
Gingival tissue: rough surface effect, 323
Gingivitis: "fusospirochetal" material, 4
——: rough surfaces, 323
Glenoid fossa: inclined planes; correlation with tooth slopes, 890
Glucose solutions: oral bacteria pH, 226
Glucose: (see also sucrose and sugar)
Glycolysis: salivary; inhibition, 966*
GOLDBERG, H. J. V.: carbohydrates; oral rinsing; anthrone method, 90
GOOSE, D. H.: maxillary permanent incisors; variability, 902
GORE, T. J.: saliva; physical and chemical properties, 102
GREEN, G. E.: bacterial flora; caries-susceptible; caries-immune saliva, 572
GREULICH, R. C.: microradiographic studies; enamel; dentin, 963*
GROSSMAN, L. I.: endodontics; antiseptics and antibiotics, 656

HANAHAN, L.: saliva; flow rate during sleep, 109
HANCOCK, J. A., JR.: abnormal enamel formation; vaccinia, 685
——: lymphocytic choriomeningitis; pregnancy; dental tissues; mice, 467
HARD, M. M.: caries experience; Washington State College; students, 132
HARGREAVES, G. L.: salivary sediment technic; caries inhibited; precision, 591
HARTLES, R. L.: flora changes; irrigated extracted teeth, 965*
——: salivary glycolysis; inhibition, 966*
HAYWARD, A. C.: salivary lactobacilli; classification, 964
HENRY, E. E.: design factors influencing performance of inverted cone bur, 704
HENSCHEL, C. J.: high speed rotating instruments; clinical evaluation, 968*
Heredity: sheep occlusion, 956*
HESS, W. C.: fluoride; organic and inorganic fractions; dentin and enamel, 205
——: lipid content; enamel; dentin, 273
——: phosphatase; peroxidase; oxidase; activity dentin; bone, 276
High speed rotating instruments: clinical evaluation, 968*
HIRSCHMAN, A.: bone bank preservation; calcifying mechanism, 970*
HITCHIN, A. D.: occlusion in sheep, 956*
HODSON, J. J.: adamantinoma; mucoepidermoid variation, 955*
HOLLOWAY, P. J.: tooth germ growth; vitamin A effects; tissue culture, 960*
HOPP, W. M.: dental arch width; 4 to 8 years, 879
HOPPERT, C. A.: fissure widths; caries; Hunt-Hoppert rats, 620
——: lactobacilli; comparative study; Hunt-Hoppert rats, 291
——: ——; frequency; Hunt-Hoppert rats, 586
——: penicillin and Terramycin; caries; bacteria, 399
——: rat saliva collections, 326
HUGHES, S. G.: tooth calcification, 961*
HUNT, H. R.: fissure widths; caries; Hunt-Hoppert rats, 620
——: lactobacilli; comparative study; Hunt-Hoppert rats, 291
——: ——; frequency; Hunt-Hoppert rats, 586
——: penicillin and Terramycin; caries; bacteria, 399
——: rat saliva collection, 326
HUNTER, H. A.: "fusospirochetal" material; experimental injection, 4
Hunter-Schreger bands: 804
Hydroxyapatite: saliva oversaturation, 245
Hygiene: oral; periodontal disease, 645
Hygroscopic expansion: 499

I.A.D.R.: annual meeting; executive proceedings, 814
——: meeting; New York section; proceedings, 968*
——: ——; British Division; participants, 954
——: ——; —— ——; proceedings, 1956, 954
——: new members elected, 818
——: officers elected, 818
——: supporting associates, 166, 328, 494, 660, 820, 971
Incisors: maxillary permanent; variability, 902
Inhibitors: acid formation; salivary sediment, 591
Instruments: cavity wall appearance, 509
IRVING, J. T.: dietary fats; tooth development, 930
Israel: caries, 630

JACKSON, D.: arrested dental caries, 956*
JACOBSON, F. L.: caries experience; Washington College students, 132
JENKINS, G. N.: plaque pH; sweets and starchy foods, 964*
JENSS, R. M.: blood loss; oral surgery, 175
JOHNSON, M.: gingival plaque; hamster, 651
JOHNSON, P. L.: stratum intermedium; tooth development, 969*
——: pulpal calcification; histogenesis and histochemistry, 714

JOHNSON, R. L.: blood loss; oral surgery, 175
JORDAN, H. V.: aciduric oral micrococci, 404
JORDAN, W. A.: caries inhibition; sodium silico-fluoride; sodium fluoride, 54
JOSEPH, N. R.: gingiva; pregnancy; electrometric studies, 566
J. D. Res.: supporting associates, 166, 328, 494, 660, 820, 971

KARLSON, K. E.: biochemical studies; oral bacteria, 603
KARSHAN, M.: periodontosis; ovarian function, 875
——: ——; urinary estrogen, 648
KERR, A. C.: chewing; salivary secretory activity, 963*
KEYES, P. H.: caries activity; whole-wheat ash diets; hamster, 95
KIFER, P. E.: fissure widths; caries; Hunt-Hoppert rats, 620
KLATSKY, M.: anthropologic study; dental anomalies, 968*
KLEBANOFF, S. G.: personality factors; cooperation in dental treatment, 157
KLEINBERG, I.: plaque pH; sweets and starch foods, 964*
KOH-glycol: organic dentin, 947
KONDO, W.: oral bacteria environment establishment; aciduric bacteria, 596
KORCHIN, L.: starch sponge; implant effects; bone, 446
KOYOUMDJISKY, E.: inclined planes of the glenoid fossa; cuspal and palatal slopes of teeth, 890
KRAMER, I. R. H.: I.A.D.R., proceedings; British Section, 954
——: plastic emulsions; cavity liners, 956*
——: pulp; vascular architecture, 957*
KRASNOW, F.: I.A.D.R.; proceedings New York section, 968
KRESHOVER, S. J.: abnormal enamel formations; vaccinia, 685
——: lymphocytic choriomeningitis; caries; pregnancy; dental tissue; mice, 467
KUMAMOTO, Y.: calcium; radioactive; tooth mineralization, 147
KYDD, W. L.: tongue forces; quantitative analysis, 171

LACTIC acid: saliva, 612
Lactobacilli: Hunt-Hoppert rats; comparative study, 291
——: ——; frequency, 586
——: isolation, 800
——: reducing activity, 370
——: saliva; classification, 964*
——: sodium fluoride effects, 939
LARSON, J. H.: fluid penetration; fillings and teeth, 518
LEACH, S. A.: fluoride uptake; enamel; dentin, 962*
Lead: enamel distribution, 430
LEBLOND, C. P.: calcium; radioactive; tooth mineralization, 147
LEE, C. Y.: lipid content; enamel; dentin, 273
LEFKOWITZ, W.: in vitro cultivation; rat tooth germ, 523
——: tooth germ cultivation; embryo extract-free medium, 440
LEOPOLD, R. S.: fluoride; organic and inorganic fractions; dentin and enamel, 205
LEVINE, L. S.: bone bank preservation; calcifying mechanism, 970*
LEVY, R. J.: differential stain; cementum, 491
LEWIS, A. B.: calcification sequence; mandibular molars and premolars, 555
LILIENTHAL, B.: anti-enzyme action; fluoride; enamel surface, 189
——: fluoride; effect on acid formation; by salivary sediment, 197
Lipid: dentin, 273
——: enamel, 273
LOBENE, R. R.: errata, 165
LOSEE, F. L.: ethylenediamine vs. KOH-glycol; organic dentin, 947
LUDWIG, T. G.: carbohydrates; food; oral rinsing; anthrone method, 90
Lungs: effects of aluminum oxide, 693
Lymphocytic choriomeningitis: pregnancy; dental tissues, 467

MACDONALD, J. B.: "fusospirochetal" material; experimental injection, 4
MAHLER, I. R.: pH levels; oral bacteria; glucose solutions, 226
Malformations: dentofacial; maternal dietary deficiency, 674
Malocclusion: Polynesians, 115
MANLY, R. S.: pH oral bacteria; glucose solutions, 226
——: salivary sediment technic; inhibitors; precision, 591
MANTZ, R. F.: dental restorative materials; antibacterial effects, 25
MARTIN, J. J.: biochemical studies; oral bacteria, 603
MARTIN, M. D.: anti-enzyme action; fluoride; enamel surface, 189
Mastication: stress, 664, 671
Materials: denture; residual monomer, 16
——: hygroscopic expansion, 499
——: restorative; antibacterial effects, 25
——: ——; epoxy resins, 360
MAURICE, C. G.: sodium fluoride; pulp effects, 69
Maxilla: early development; enamel, 959*
McCHESNEY, M. N.: salivary amylase; determination, 391
McDANIEL, W. L.: nerve distribution; maxillary teeth; variations, 916
McLEAN, J. W.: plastic emulsions; cavity liners, 956*
McSHANE, J.: endodontics; antiseptics and antibiotics, 656
MEHTA, R. S.: oral hygiene habits; periodontal disease, 645
MELLANBY, M.: tooth germ growth; vitamin A effects; tissue culture, 960*
Mercury: residual; amalgam restorations, 458
MEREDITH, H. V.: dental arch width; 4 to 8 years, 879

Methacrylate: polymethyl; residual monomer, 16
Microradiographic studies: dentin; enamel, 963*
Mineralization: tooth; radioactive calcium, 147
MITCHELL, D. F.: gingival plaque; hamster, 651
Monomer: residual; polymethyl methacrylate, 16
MOORE, B. W.: dental plaque; acid formation; caries-active individuals, 778
MORGENSTERN, W.: in vitro calcification; aorta; soft tissues, 970*
MORSE, E. H.: caries; food habits; Connecticut, 638
MORTELL, J. F., JR.: cavity walls; surfaces; instrument effects, 509
——: Hunter-Schreger bands, 804
MOSNY, J. J.: penicillin-sensitive; oral bacteria; protection; yeasts, 249
Mucoceles: pathogenesis, 863
MUHLER, J. C.: adrenal cortex histochemistry; following salivary gland removal, 547
——: caries activity; desalivated rats, 615
——: desiccated thyroid; propylthiouracil; testosterone; fluorine; submaxillary gland; rat, 922
——: enamel permeability; fluorides, 59
——: stannous-fluoride dentifrice; caries; adults, 49
——: urinary fluorine levels; stannous fluoride-containing dentifrice, 760
——: x-ray fluorapatite formation; fluoride treatment, 773
MYERS, H. I.: mandibular condyle remolding; osteoclasts, 137

NAPOLI, P. J.: personality factors; cooperation in dental treatment, 157
NATHANS, J. W.: punched-card records; carious lesions, 950
NEBERGALL, W. H.: stannous-fluoride dentifrice; caries; adults, 49
NEDERVEEN-FENENGA, M.: caries; nutrition; histologic investigation, 39
Nerve: distribution; maxillary teeth; variation, 916
——: endings; gingiva; palate; tongue, 958*
——: silver staining; urea solutions, 958*
——: supply; maxillary teeth, 958*
NEUMANN, H. H.: proportionate relevance; human caries factors, 969*
Nevi: oral epithelial, 954*
NIKIFORUK, G.: saliva; reducing properties; indicator dyes, 377
NOBLE, H. W.: cotton fibers; operative wounds, 956*
NOLTE, W. A.: pH; dental plaque; saliva, 83
Nutrition: caries, 39, 95, 638

OCCLUSION: caries incidence, 344
——: sheep, 956*
OCKERSE, T.: experimental periodontal lesions; white-tailed rat, 9
Odontogenesis: abnormal; vaccinia, 685
——: biometric analysis, 479
——: calcification; mandibular teeth, 555
——: dietary fats, 930
——: in vitro, 440, 523, 960*
——: lymphocytic choriomeningitis effect, 467
——: rat tooth, in vitro, 440, 523, 960*
——: stratum intermedium, 969*
——: vitamin A effect, 960*
——: x-ray investigations, 960*
ONISI, M.: oral bacteria environment establishment; aciduric bacteria, 596
Oral mucosa: recurrent ulcerations, 954*
Oral surgery: blood loss, 175
ORSÓS, S.: rat incisor; eruption; prolonged sleep effect, 562
Osteoclasts: 137
——: mandibular condyle remolding, 137
Ovarian function: periodontosis, 875
Oxidase: bone, 276
——: dentin, 276

PADDOR, O. R.: penicillin-sensitive; oral bacteria; protection; yeasts, 249
Palate: nerve endings, 958*
PECKHAM, S. C.: ethylenediamine vs. KOH-glycol; organic dentin, 947
——: lipid content; enamel; dentin, 273
——: fluoride; organic and inorganic fractions; dentin and enamel, 205
Penicillin: caries; bacteria, 399
Penicillin-sensitivity; oral bacteria; yeast protection, 249
Periodontal disease: classification and scoring, 350
——: oral hygiene habits, 645
——: Polynesians, 734
Periodontal lesions: experimental; white-tailed rat, 9
Periodontosis: cyanotic individuals, 840
——: "fusospirochetal" material, 4
——: ovarian function, 875
——: urinary estrogen, 648
Peroxidase: dentin; bone, 276
Personality factors: cooperation in dental treatment, 157
PETERSON, J.: caries inhibition; sodium silico-fluoride; sodium fluoride, 54
PEYTON, F. A.: cavity walls; surfaces; instrument effects, 509
——: Hunter-Schreger bands, 804
pH: oral bacteria; glucose solutions, 226
——: plaque; saliva, 83
——: ——; sweets and starch foods, 964*
——: (see also acid)
PHILLIPS, R. W.: residual mercury; amalgam restorations; strength, 458
Phosphatase: bone; dentin, 276
PIGMAN, W.: saliva; flow rate during sleep, 109
Plaque: dentobacterial; acid formation; sugar, 220
——: ——; lactic acid formation; caries-active individuals, 778
——: ——; pH, 83
——: gingival; hamster, 651
Plastic emulsions: cavity liners, 956*

PLOTKIN, R.: dental plaque; acid formation; primitive Bushmen, 786
Polynesians: dental conditions; malocclusion, 115
——: periodontal disease, 734
PORTER, D. R.: laboratory tests for caries activity; evaluation, 332
POTGIETER, M.: caries; food habits; Connecticut, 638
Pregnancy: gingiva, 566
——: lymphocytic choriomeningitis; mice, 467
Propylthiouracil: salivary gland effects, 922
Protein: dentin and enamel, 260
Protozoa: sodium fluoride effects, 763
Pulp: calcification; histochemistry and histogenesis, 714
——: nerves; accommodation, 723
——: reaction; electric current, 723
——: sodium fluoride effects, 69
——: vascular architecture, 957*
Punched-card records: carious lesions, 950

RADIATION: salivary glands; enzymatic activity, 966*
——: (see also radioactive, x-ray)
RADIKE, A. W.: stannous-fluoride dentifrice; caries; adults, 49
Radioactive calcium: 147
——: fluid penetration; fillings, 518
Radiographs: caries diagnosis, 33
RAE, J. J.: ammonia production; saliva, 438
——: saliva; lactic acid production, 612
RAGHEB, H. S.: lactobacilli; comparative study; Hunt-Hoppert rats, 291
——: penicillin and Terramycin; caries; bacteria, 399
RAMNARINE, K. C.: antibiotics; operative procedures and endodontics, 914
RANDLES, C. R.: sorbitol fermentation; oral bacteria, 233
RATHJE, W.: saliva; oversaturation; hydroxyapatite, 245
Reducing activity: lactobacilli, 370
Reducing properties: indicator dyes, 377
REEVE, W. L.: mandibular condyle remolding; osteoclasts, 137
Resin: bonding to dentin, 846
——: epoxy, 360
Restorations: cavity wall appearance, 509
——: fluid penetration, 518
RING, C. E.: x-ray fluorapatite pattern; fluorides, 773
ROBINSON, H. B. G.: Editor's Viewpoint, 1, 167, 329, 495, 661, 821
Root growth: biometric analysis; rat, 479
ROSEN, S.: lactobacilli frequency; Hunt-Hoppert rats, 586
——: lactobacilli; comparative study; Hunt-Hoppert rats, 291
——: penicillin and Terramycin; caries; bacteria, 399
Rotifera: sodium fluoride effects, 763
ROWLES, S. L.: nerves; silver staining; urea solutions, 958*
RUSSELL, A. L.: periodontal disease; classification and scoring, 350
RUSSELL, L. H.: pulp; vascular architecture, 957*
RYGE, G.: hygroscopic expansion, 499

SAINSBURY, H.: season of birth; primary dentition, 909
Saliva: acidity; caries, 385
——: alkalinity; caries, 385
——: ammonia, 438
——: amylase, 391
——: caries-susceptible; caries-immune; bacteria, 572
——: chemical properties, 102
——: chloride level, 753
——: desalivated rats; caries, 615
——: flow rate during sleep, 109
——: glycolysis; inhibition, 966*
——: lactic acid production, 612
——: lactobacilli, 572, 964*
——: over-saturation; hydroxyapatite, 245
——: pH, 83
——: physical properties, 102
——: rat; collection, 326
——: reducing properties; indicator dyes, 377
——: secretory activity; chewing, 963*
——: sediment; acid formation; fluoride, 197
——: ——; —— ——; sugar, 220
——: ——; technic, 591
——: tryptophane, 241
Salivary gland: desiccated thyroid; propylthiouracil; testosterone; fluorine effects, 922
——: effect on adrenal cortex, 547
——: obstructive adenitis, 852
——: mucoceles, 863
——: radiated; enzymatic activity, 967*
SALLAY, C.: periodontal findings; cyanotic individuals, 840
SANJANA, M. K.: oral hygiene habits; periodontal disease, 645
SCHATZ, A.: biochemical studies; oral bacteria, 603
SCHERP, H. W.: chondrosulfatase; production; oral bacteria, 299
SCHMIDT, E. G.: reducing activity; lactobacilli, 370
SCHNEYER, L. H.: saliva; flow rate during sleep, 109
SCHOCKLEY, T. E.: sorbitol fermentation; oral bacteria, 233
SCHOUR, I.: sodium fluoride; pulp effects, 69
SCHULTZ-HAUDT, S. D.: chondrosulfatase; production; oral bacteria, 299
SCHWEINSBERGER, R. A.: urinary fluorine levels; stannous fluoride-containing dentifrice, 760
SCOTT, J. H.: nerve supply; maxillary teeth, 958*
Sex: caries distribution, 286
SHAFER, W. G.: desiccated thyroid; propylthiouracil; testosterone; fluorine; submaxillary gland; rat, 922
SHAW, J. H.: caries distribution; sexual similarity; bilateralcy; rats, 286
SHAY, D. E.: dental restorative materials; antibacterial effects, 25

SHIOTA, T.: lactobacilli; sodium fluoride effects, 939
SHOEMAKER, D. W.: calcification sequence; mandibular molars and premolars, 555
SINGER, J. L.: personality factors; cooperation in dental treatment, 157
Sleep: eruption rate, 562
——: salivary flow rate, 109
SMITH, D. C.: residual monomer; polymethyl methacrylate, 16
SMITH, F. A.: fluoride distribution; enamel, 420
SNYDER, M. L.: laboratory tests for caries activity; evaluation, 332
——: salivary amylase; determination, 391
SOBEL, A. E.: bone bank preservation; calcifying mechanism, 970*
——: in vitro calcification; aorta; soft tissues, 970*
Sorbitol: oral bacteria, 233
SPIES, H. C.: lactobacillus isolation; efficiency, 800
SPIES, T. D.: penicillin-sensitive; oral bacteria; protection; yeasts, 249
Squamoso-mandibular articulation: development; rat, 533
STACK, M. V.: carbohydrate content; enamel, 966*
Stannous fluoride: dentifrice, 49, 760
STAPLE, P. H.: boric acid; histochemical blocking; reagent, 965*
Starch sponge: implant; bone, 446
STEADMAN, L. T.: enamel; lead distribution, 430
——: enamel; tin distribution, 749
Stratum intermedium: tooth development, 969*
Stress: mastication, 664, 671
Sucrose: enamel solubility effects, 210
Sugar: acid formation; plaque; salivary sediment, 220
——: plaque pH, 964*
——: (see also glucose sorbitol and sucrose)
SUHER, T.: laboratory tests for caries activity; evaluation, 332
Supporting associates: I.A.D.R.; J.D.R., 166, 328, 494, 660, 821, 971
SWARTZ, M. L.: residual mercury; amalgam restorations; strength, 458
SWAYNE, P.: in vitro cultivation; rat tooth germ, 523
——: tooth germ cultivation; embryo extract-free medium, 440
SWEENEY, E. A.: caries distribution; sexual similarity; bilateralcy; rats, 286

TEETH: enamel; chemical analysis, 742
Temporomandibular joint: squamoso-mandibular articulation, 533
TEN CATE, A. R.: enamel organ cells, 960*
TENENBAUM, B.: periodontosis; ovarian function, 875
——: ——; urinary estrogen, 648
Terramycin: caries; bacteria, 399
Testosterone: salivary gland effects, 922
Thyroid: salivary gland effects, 922
Tin: enamel, 749
TONGE, C. H.: dental lamina, 959*
Tongue: forces; quantitative analysis, 171
——: sensory nerve endings, 958*
Tooth germs: cultivation in vitro, 440, 523, 960*
Tryptophane: saliva, 241
TULLAR, P. E.: acid formation from sugar; plaque; salivary sediment, 220
TURNER, N. C.: dimethylaminobenzaldehyde; salivary tryptophane measure, 241
——: saliva; acidity; alkalinity; caries, 385

ULCERATIONS: recurrent; oral mucosa, 954*
Urinary fluorine levels: stannous fluoride-containing dentifrice, 760

VACCINIA: abnormal enamel formation, 685
VARGAS, F. F.: normal and pathologic pulp nerves; accommodation, 723
VERMILLION, J.: caries diagnosis; radiographs, 33
Vitamin A: tooth germ effect, 960*

WAERHAUG, J.: enamel cuticle, 313
——: rough surfaces; gingival tissue effect, 323
WAGG, B. J.: flora changes; irrigated extracted teeth, 965*
WANTLAND, W. W.: parasites; protozoa; rotifera; sodium fluoride effects, 763
WARKANY, J.: congenital dentofacial malformations; maternal dietary deficiency, 674
WEBSTER, R. C.: adrenal cortex histochemistry following salivary gland removal, 547
WEDDLE, D. A.: fluorides; skeletal storage, 65
WEIDMANN, S. M.: fluorine; skeletal distribution, 963*
WEINMANN, J. P.: experimental obstructive adenitis, 862
——: mucoceles; pathogenesis, 863
——: squamoso-mandibular articulation; development; rat, 533
WEINREB, M. M.: caries prevalence; Israel, 630
WHITE, A. A.: phosphatase, peroxidase, oxidase activity; dentin; bone, 276
WIENER, R.: periodontosis; ovarian function, 875
WILEMAN, W.: resin composition; bonding to dentin, 846
WITKOP, C. J.: fissure widths; caries; Hunt-Hoppert rats, 620
Wounds: operative; cotton fibers, 956*

X-RAY: fluorapatite pattern; fluoride treatment, 773
X-ray investigations: developing enamel, 960*
Xylocaine: anesthesia, 824

YEASTS: protection; penicillin-sensitive; oral bacteria, 249

ZANDER, H. A.: epithelial attachment; study method, 308
